Remote-ready: 250/290 Mbps fiber • Dedicated home workstation • Flexible across US, AU & PH business hours

PROFESSIONAL SUMMARY

AI Automation Specialist who builds production workflows in Zapier, n8n, and Make and ships full-stack AI web applications with Claude Code, GitHub, Supabase, and Vercel. Since 2025, has delivered 30+ client automations spanning CRM pipelines, lead generation, customer support, and AI content publishing, eliminating 20+ hours of manual work per week while maintaining 99% uptime. Comfortable owning the full lifecycle: process discovery, LLM prompt design, API integration, database setup, version control, deployment, and client training. Actively growing toward an AI Engineer role by building agentic, code-first AI systems alongside no-code automation.

CORE SKILLS & TOOLS

- **AI & LLM Development:** Claude Code (agentic coding), OpenAI, Groq, prompt engineering, LLM classification & lead scoring, AI content generation, AI output evaluation & monitoring
- **Web Apps & Deployment:** Landing pages and web applications built with Claude Code; Supabase (database, authentication); Vercel (hosting, auto-deploy); GitHub (repositories, version control, CI/CD)
- **Automation Platforms:** Zapier (Expert), n8n, Make (Integromat), GoHighLevel
- **APIs, Data & Scraping:** REST APIs, webhooks, JSON, custom API steps, Google Apps Script, JSearch API, Prospeo, Scrapling (Python web scraping)
- **CRM, Data & Reporting:** GoHighLevel, HubSpot, ActiveCampaign, Google Sheets, Airtable, Notion, Google Drive
- **Process & Delivery:** Workflow mapping, documentation, Zap maps, runbooks, client training, uptime monitoring, client-facing communication

WORK EXPERIENCE

AI Automation Specialist & AI App Builder — Freelance **2025 – Present**

Tools: *Zapier, n8n, Make, Claude Code, GitHub, Supabase, Vercel, GoHighLevel, Google Sheets, Airtable, OpenAI, Groq*

- Build and maintain 30+ multi-step automation workflows across CRMs, email platforms, and data tools, eliminating 20+ hours per week of manual follow-up for clients.
- Build landing pages and full-stack web applications with Claude Code, managed in GitHub repositories and deployed on Vercel with Supabase as the backend database and auth layer.
- Engineered a code-based AI lead generation system in Claude Code that scrapes, scores, and selectively enriches leads, cutting spend on paid enrichment APIs.
- Designed lead capture funnels with automated sequences, lifting click-through and response rates by an average of 15%.
- Connect GoHighLevel, Google Sheets, and Airtable through webhooks and custom API steps, replacing manual handoffs with real-time data sync.
- Diagnose and rebuild broken workflows, misconfigured triggers, and failed filters, monitoring performance to maintain 99% uptime across client stacks.
- Own projects end to end (discovery, process mapping, build, testing, AI evaluation, deployment, documentation, and training) for marketing agencies, staffing agencies, e-commerce, and service businesses.

Secretariat Staff — One Stop Shop Secretariat, Mactan-Cebu International Airport Authority **2022 – 2024**

- Coordinated scheduling and document routing for OSS operations, keeping daily office workflow moving without bottlenecks.
- Served as primary liaison between the secretariat and multiple on-site government and corporate partner agencies, resolving cross-agency requests.
- Prepared meeting minutes, reports, and data records to keep operations audit-ready; guided walk-in applicants through processing requirements, reducing repeat visits.

FEATURED PROJECTS: AI & WEB DEVELOPMENT

Talent Showcase & Shortlisting Web App | *Claude Code, Supabase, Vercel, GitHub*

- Building a two-sided web app where staffing-agency clients browse employee profile flashcards (photo + details) and shortlist candidates for hire.

- Includes an admin panel for managing employee profiles and secure client logins with saved shortlists, backed by a Supabase database and authentication.
- Set up a GitHub-to-Vercel pipeline that auto-deploys every code update; mobile app version planned as the next phase.

AI Lead Generation & Qualification System | *Claude Code, Python (Scrapling), Google Sheets*

- Built a lead research engine in Claude Code using the open-source Scrapling library to scrape and research companies across US and DACH markets.
- Added AI scoring so only high-quality leads pass to paid email enrichment, conserving credits on subscription-based APIs; chat acts as the query interface and every lead is logged to Google Sheets.

FEATURED AUTOMATION PROJECTS

CRM & Sales Pipeline Automation | *Zapier • Typeform, OpenAI, Google Sheets, Trello, Gmail, Slack*

- Built a 3-Zap, 44-step workflow that uses AI to score inbound leads as Hot, Warm, or Cold and route each to a tailored follow-up track with Trello deals, email cadences, and Slack alerts.
- Added automated nurture follow-ups for non-converting leads, keeping the pipeline working after the first touch.

Job Poster Scraping & Enrichment Engine | *n8n • JSearch API, Prospeo, Google Sheets, Gmail, Slack*

- Built a staffing-agency lead engine: Slack query → AI validation → job scraping → deduplication → Prospeo contact enrichment of senior decision-makers.
- Routed enriched leads across 4 Google Sheets branches and generated AI outreach emails as Gmail drafts with a Slack recap.

AI Customer Support Chatbot | *n8n • Groq AI, Google Sheets, Gmail, Slack*

- Built AI ticket handling: webhook intake → AI classification → knowledge-base lookup → 8-branch routing → personalized reply, with Sheets logging and instant Slack escalation for complaints.

AI Job Scraper + Resume Optimizer | *n8n • JSearch API, OpenAI, Slack, Google Drive*

- Scheduled workflow pulls live job listings, scores each against a master resume, and delivers a tailored resume per role via Slack with a match score, cutting hours of weekly application work to minutes.

AI Content Generator & Publisher | *n8n • Groq AI, Notion, Google Sheets, Gmail, Slack*

- Fans one topic out into 5 parallel AI content calls (blog, Instagram, LinkedIn, X, newsletter), then publishes to Notion with a human-review branch before distribution.

Client Onboarding Pipeline | *Zapier • Typeform, Google Drive, Google Sheets, Trello, Gmail, Slack*

- Designed a 22-step, 4-path workflow that routes each client type to the correct onboarding track: Drive folder, CRM log, Trello card, welcome email, and Slack alert.

AI Feedback Sentiment Analyzer | *Make • OpenAI, Google Sheets, Gmail, Slack, Buffer*

- Routes feedback through OpenAI sentiment analysis into a 3-way router with tailored follow-ups, plus an SLA watchdog that re-alerts Slack on negative tickets left open past 24 hours.

Social Media Content Calendar | *Zapier • Google Sheets, Trello, Gmail, Slack*

- Automated a Sheets-to-Trello content pipeline with multi-path routing, AI-generated captions, and timed Slack reminders to keep the content team on schedule.

EDUCATION

Bachelor of Science, Aircraft Maintenance Technology 2013 – 2018
